Pilot Serie

Photo der Pilot XL

The classic, timeless design of these pilot's watches evolved from the need for an instantly readable, highly accurate timepiece by early aviators. The large clear dial with luminous hands and numbers is protected by a sapphire crystal. The Swiss made ETA 2824-2 automatic movement is visible through the display back. The case is available in high grade stainless steel with a fine satin finish, or the Pilot T (42mm) in pure titanium.

With a black dial the Pilot is available in three sizes: the new Pilot XL (45mm), the classic Pilot (42mm) and the Pilot M (39mm). The Pilot W (42mm) has a white dial with luminous hands and hour markers. The Pilot BB, MBB and BW models have a black PVD coated stainless steel case. The Pilot L (39mm) is built for left-handed people. Also, the Pilot H (42mm): H is for 'historic'. The simple dial with no brand name, no date and blued hands pays homage to the original designs of old pilots watches.
