## SportTaucher

We have updated this tough, distinctive, 300m rated divers watch, giving it a re-engineered bezel, up-rated crown-tube system and a rounded case back for greater comfort. We have also introduced a black PVD version.

The high-grade stainless-steel 41.5mm case is only 12mm thick, making this not only a serious diving watch, but also comfortable every day wear. The screw-down crown is at four o'clock for protection and the case features a crown guard. The simple clean dial ensures easy readability. The bezel is unidirectional, with a diver specific 60 minute scale and a luminous marker at 12 o'clock.

This is a robust watch and it uses a robust movement, the highly regarded Swiss ETA 2824-2 automatic. Straps are crafted from genuine sharkskin or rubber. A stainless steel bracelet with safety clasp and fold-out extension, to enable wearing it over a wetsuit, is also available.
